

To Whom It May Concern:

It is difficult over the last several years not to feel defeated. This is in large part because I, a common, middle-class citizen, hear my voice being quieted. Those programs on the airways that reflect my values are being threatened, and now Sinclair broadcasting is forcing their stations to air an anti-Kerry documentary just days before the election. The airwaves should serve the public interest. That means balanced broadcasting and also airing "Going Up River", which they have no plans to do. I strongly protest media consolidation and the above abuse which is a direct result. Please protect our freedoms before they are gone.
Thank you, Barbara McIntyre
